

PRODUCT SPECIFICATIONS

45 Series Ø22mm Metal Bezel Switches

Technical Data

Conventional free air thermal current I_{th}
10 A, as per EN IEC 60947-5-1

Switch rating
Switch rating AC with silver contact
600 VAC, 1A, services category AC-15, as per EN IEC 60947-5-1

Environmental conditions

Switching system
Self cleaning, double-break rolling action silver contact with raked surface. The slow-make elements are constructed as per EN IEC 60947-5-1.

Electrical characteristics

Conventional free air thermal current I_{th}
10 A, as per EN IEC 60947-5-1
the maximum current in continuous operation and at ambient temperature must not exceed the quoted maximum values.

Switch rating
Switch rating AC (inductive) with silver contact
service category AC-13, as per EN IEC 60947-5-1

Switch rating AC (inductive) with silver contact
service category AC-14, as per EN IEC 60947-5-1

Switch rating (non-inductive) with silver contact

Switch rating DC with silver contact service
category DC-13, as per EN IEC 60947-5-1

Material
Silver contact

Short-circuit protection
Series-connected blow-out fuse 10 A gL

Overvoltage category
III, as per EN IEC 60947-5-1

Degree of pollution
3, as per EN IEC 60947-1

Contact Ratings (Contact Block)

Operating Voltage (AC/DC)		12V	24V	110V	230/240V
AC 50/60 Hz	Resistive Load	10A	10A	10A	6A
	Inductive Load	10A	10A	5A	3A
DC	Resistive Load	16A	8A	2.2A	1.1A
	Inductive Load	8A	4A	1.1A	0.6A
Contact Material		Silver			
Rated Insulation Voltage		600V			
Rated Thermal Current		10A			

• Minimum applicable load: 3V AC/DC, 5 mA
(applicable range may vary with operating conditions and load types)

Material

Mushroom-head cap
Polyamide (PA)

Actuator housing
Metal, self-extinguishing

Switching element
Polyamide (PA), Polysulfon (PSU)

Material of contact
Silver (Ag)

Approvals
Approbations and Declaration of conformity
CE **CE**

Mechanical characteristics

Terminals
Housing in different colors for NO and NC conatcts
Spring lift terminal helps easy wiring.

Unlock torque
25 Ncm approx.

Actuating travel
8.5 mm

Rebound time
≤2 ms

Specifications

Operating Temperature		-25 to +60°C (No freezing)
Storage Temperature		-40 to +80°C
Operating Humidity		45 to 85% RH (No condensation)
Contact Resistance		50 mΩ maximum (Initial value)
Insulation Resistance		100 MΩ minimum (500V DC megger)
Dielectric Strength		Between live and dead metal parts: 2,800V AC, 1 minute Between terminals: 2,800V 1 minute Indicators: 2,200 for 1 minute
Vibration Resistance	Push buttons, Indicators, Selector Switches and Key Selector Switches	Operating extremes: 5 to 55 Hz. amplitude 1 mm Damage limits: 30 Hz, amplitude 1.5 mm
	E-Stop Switches	Operating extremes: 10 to 550 Hz. amplitude 0.35 mm Acceleration: 50 m/s ² (5G)
Shock Resistance	Push buttons, Indicators, Selector Switches and Key Selector Switches	Operating extremes: 100 m/s ² (15G) Damage limits: 1000 m/s ² (100G)
	E-Stop Switches	Operating extremes: 100 m/s ² (15G) Damage limits: 1000 m/s ² (100G)
Mechanical Durability (Minimum operations)	Push buttons and Illuminated push buttons	1,000,000
	Selector switch and Key selector switch	
	E-Stop Switches	
Electrical Durability (Minimum operations)	Push buttons, Selector switch and key selector switch	1,000,000
	E-Stop Switches	
Degree of Protection		Enclosed (IP20) Waterproof, dust-tight (IP65)

LED lamp Ratings

Type	12V	24V	110V	230/240 V
Voltage Range	12V AC/DC ±10	24V AC/DC ±10%	110V AC/DC ±10%	230/240V AC/DC ±10%
Rated Voltage	12V AC/DC	24V AC/DC	110V AC/DC	230/240V AC/DC
Current Draw AC/DC	14 mA	10 mA	5.5 mA	2.7 mA
Colour	Red			
	Amber			
	Yellow			
	Green			
	Blue			
	White			
Life (reference value)	Approx. 100,000 hours (The luminance is reduced to 50% the initial intensity when used on complete DC.)			
Internal Circuit	   LED Chip  Protection Diode  Zener Diode			

45 Series Metal Switches

ø22mm **WERNER**

Model Number Structure - Pushbutton

45.110.11.02.00

Series
45 Series Metal Switches ø22mm

Operation Type		
110	Non-Illuminated Flush	Momentary
111	Non-Illuminated Extended	Momentary
112	Non-Illuminated Extended with full shroud	Momentary
113	Non-Illuminated Mushroom	Momentary
114	Illuminated Flush	Momentary
115	Illuminated Extended	Momentary
116	Illuminated Extended with Full Shroud	Momentary
117	Illuminated Mushroom	Momentary
118	Twin Head	Momentary
120	Non-Illuminated Flush	Maintained
121	Non-Illuminated Extended	Maintained
122	Non-Illuminated Extended with full shroud	Maintained
123	Non-Illuminated Mushroom	Maintained
124	Illuminated Flush	Maintained
125	Illuminated Extended	Maintained
126	Illuminated Extended with Full Shroud	Maintained
127	Illuminated Mushroom	Maintained

Voltage (Illuminated Types Only)	
12	12V AC/DC
24	24V AC/DC
11	110V AC/DC
23	230/240V AC/DC
00	Non-Illuminated

Accessories

Appearance	Part No.	Description & Dimensions (mm)
	44.02.01	Metallic tool used to tighten the plastic locking ring when installing the 45 series control unit in a panel. 
	44.02.06	Used for plugging unused mounting holes in the panel. Color: Black 
	44.01.53	Prevents rotation of switches in panel. Mainly used with selector switches when no nameplate is used. With waterproof gasket (IP65). Made of plastic (black). 
	44.01.60	Round bottom, Plastic (black) 1.5 mm thick 
	44.01.61	Square bottom, Plastic (black) 1.5 mm thick 
	44.01.62	Square, Plastic (black) 1.5 mm thick 
	44.01.63	Round, Yellow Color Blank 
	44.01.64	

- Installing the marking plate on a nameplate

- To remove the marking plate, insert the flat screwdriver between the marking plate and nameplate.

When requiring no anti-rotation, remove the projection using pliers.

Note: When using an nameplate, the mounting panel thickness is decreased by 1.5 mm.

Safety Precaution

General

- Failure to turn the power off may cause electrical shocks or fire hazard. Please turn off the power to the 45 series switches before starting installation, removal, wiring, maintenance, and inspection of the products
- Use the lamp holder tool when replacing lamps to avoid burning your hand.
- Failure to tighten the terminal screws may cause overheating or fire. In case of wiring, tighten the M3.5 terminal screws to a tightening torque of 1.0 to 1.3 N.m.

Panel Mounting

- Remove the contact block from the operator (for pilot light, remove the transformer or full voltage unit from the pilot light). Remove the locking ring from the operator into the panel cut-out from the front, tighten the locking ring from the back, then install the contact block to the operator.

Removing and Installing the Contact Block

① Pull up the locking lever.

② Turn the lever to the left.

③ Pull out the contact block.

1. To remove the operator from the contact block, pull up the locking lever and turn it to the left. Then the operator can be pulled out.

2. To reinstall, place the TOP marking on the operator and the werner marking on the contact block mounting adapter in the same direction, and insert the operator into the contact block mounting adapter. Then turn the locking lever to right

Removing the Full Voltage Unit

1. To remove the full voltage unit, squeeze the full voltage unit from both sides to disengage the latch as shown, and pull it out. Like the transformer unit, the full voltage unit can also be pulled out by inserting a flat screwdriver into the latch hole as shown.
2. To reinstall, place the TOP markings on the operator and the latch on the full voltage unit in the same direction, and insert the operator into the full voltage unit.

Notes for Panel Mounting

1. Use the optional locking ring wrench to mount the operator onto a panel. Tightening torque must not exceed 2.0 N · m. Do not use pliers. Excessive tightening will damage the locking ring.
2. For contact blocks and transformers housing LED and incandescent lamps, make sure not to press the lamps too hard, otherwise the lamp socket may be damaged.

With Full Shroud

Mushroom

Pilot Light

Flush Extended Dome

Flush Marking

Removing and Installing the Transformer Unit

1. Insert a flat screwdriver (5 mm wide at maximum) into the latch hole on the transformer unit as shown in the photo below, and disengage the latch. Then pull out the operator.
2. To reinstall, place the TOP marking on the operator and the latch in the same direction, and push the operator into the transformer unit.

Safety Precaution

Replacement (LED and incandescent lamps)

Lamps can be replaced using the lamp holder tool from the front of the panel, or by removing the contact block from the operator unit.

Removing the Lamp from the Front of the Panel

To remove, gently insert the lamp holder tool onto the lamp head. Then push slightly, and turn the lamp holder tool to the left.

Installing the Lamp from the Front of the Panel

1. To install, insert the lamp head into the lamp holder tool, and hold the lamp as shown in the figure below.

2. Place the pins on the lamp base to the grooves in the lamp socket. Insert the lamp and turn it to the right.

Note: LED lamps in unibody type pilot lights cannot be replaced.

Nameplate

When anti-rotation is not required, remove the projection from the nameplate using pliers.

Handling

Do not expose the switch to excessive shock and vibration, otherwise the switch may be deformed or damaged, causing malfunction or operation failure.

Removing Contact Blocks and Full Voltage Adapter

Insert a flat screwdriver between the latch and contact block mounting adapter, and disengage the latch.

Make sure to remove the lamp and contact blocks before removing the full voltage adapter.

Tightening Torque for Terminal Screws

Tighten terminal screws to a torque of 1.0 N·m.

Anti-rotation Ring and Mounting Panel

Turn the TOP marking on the operator and the ▲ mark on the anti-rotation ring to the recess on the mounting panel.

Mounting Panel Thickness

The mounting panel must be 0.8 to 6.0 mm in thickness. When optional accessories are added, the applicable panel thickness changes as shown below.

Contact Bounce

When pressing or turning the operator, the NC and NO contacts will bounce. When designing a control circuit, take the contact bounce time into consideration.

Terms And Conditions

Please read this catalog before purchasing any products. Please consult your *WERNER* representative for any clarifications or comments.

Application Considerations

WERNER shall not be responsible for conformity with any regulations, codes or standards that apply to use of the products. *WERNER* shall provide applicable third party certification documents identifying ratings and limitations of use that apply to the products in case of the customer's request.

Prevent use the products for an application involving risk to life or property. Be sure that the *WERNER*'s products are properly rated and installed for the overall system or equipment.

WERNER shall not be responsible for the user's programming of a programmable products.

Warranty

WERNER's warranty represents that the products are free from defects in materials and workmanship for a period of one year.

WERNER shall not be responsible for any special loss of profit, commercial loss, indirect or consequential damages relevant to products.

WERNER shall not be responsible for repair, warranty or any claims regarding the products unless *WERNER*'s Analysis confirm that the products were properly stored, installed, handled, maintained and not a result of accident, insufficient, abuse, misuse, natural disaster, improper installation excessive electrical supply, environmental conditions or abnormal mechanical.

Disclaimers

WERNER shall practice to change type/model numbers when published ratings or features are changed, however some specifications of the products may be changed without any notice.

When in doubt, please consult with your *WERNER* representative to confirm actual specifications of products.

WERNER shall change product specifications and accessories at any time based on improvements and other reasons.

The information in this catalog has been carefully checked. However, *WERNER* take no responsibilities for clerical, typographical or proofreading errors.
